Main Competency/Task Group/Level Indicator:

- Find and Use Information/Read continuous text/A1.2

Materials Required:

- Pen/pencil and paper and/or digital device

Learner Information

Most pharmacies provide “Prescription Information Sheets” to customers when they start a new medicine. The Information Sheet helps the individual understand why they are taking the medicine, how to take it, possible side effects, and cautions (things to be careful of) about the medicine. It is helpful information to have and helps keep people safe.

Scan the “Prescription Information Sheet”.

Dr: Wooly, Brent W.		

Name of medication: Pioxidatoyn (pye-ox-i-DAY-toyn) 2.5mg tablet

Directions: Take 1 tablet 3 times a day. Take on an empty stomach at least 2 hours after a meal.
Drink lots of water with this medication.

Common uses: This medicine is an anti-infective used to treat infections of the inner ear. It may also be used to treat other conditions as determined by your doctor.

How to use this medicine: Follow the directions for using this medicine provided by your doctor.
Swallow whole, do not break, crush or chew before swallowing. Avoid milk and dairy products while taking this medication. Store this medicine at room temperature, away from heat and light. To clear up your infection completely, continue taking this medicine for the full course of treatment even if you feel better in a few days. Do not miss any doses. If you do miss a dose, take it as soon as possible. If it is almost time for your next dose, skip the missed dose and go back to your regular dosing schedule. Do not take two doses at once.

Cautions: If your symptoms do not improve within a few days or if they become worse, check with your doctor. This medicine may cause drowsiness. Do not drive, operate machinery, or do anything else that could be dangerous until you know how you react to this medication. If you have Diabetes Mellitus, this medicine may cause false test results with some urine

Task Title: PrescriptionInformation_I_A1.2

glucose tests. Check with your doctor before adjusting the dose of your diabetes medicine or changing your diet.

Possible side effects: You may experience headaches and mood swings. Tell your doctor if you experience chest pains, fever, chills, cough, difficulty breathing, rash or tingling or numbness in fingers or toes. If you notice other effects not listed above, contact your doctor, nurse or pharmacist.
