Answers

Task 1: Search for the term “OEM” used in the auto industry. Write a definition.

Answer: OEM is an abbreviation of “Original Equipment Manufacturer”. When referring to automotive parts, OEM designates a part or replacement part made by the original manufacturer. As most cars are originally assembled with parts made by companies other than the one whose badge appears on the vehicle, it may happen that a car company sells OEM spare parts without claiming to have manufactured the part itself.

Task 2: Search for the term “aftermarket” used in the auto industry. Write a definition.

Answer: Aftermarket refers to supplies, accessories, or spare parts used in the repair or maintenance of vehicles. This is equipment that is not made by the original manufacturer.

Task 3: Many customers choose to replace the less difficult parts of an automobile themselves. A customer has asked where they can get Rain X wipers for his 2022 Toyota Corolla. Search for this product and list three stores in Canada that carry that brand of wiper.

Answer: Rain-X online, Canadian Tire, Canadian Auto Parts online, Amazon, Toyota.ca
